

RESEARCH DATA & RESOURCES

Latinos and Economic Security (LES) is a national research project funded by the Ford Foundation designed to enhance retirement security for middle-aged and older Latinos by developing and fostering a new policy agenda that will make issues of aging Latinos a priority for policy makers as well as the Hispanic community.

In 2006, white older baby boomers (born 1946-1953) in general had far more assets (\$200,000) than either older Latino boomers (\$44,200) or older black boomers (\$23,000); however, when education level is considered, the disparity in assets between whites and Latinos was greatly reduced. This was especially true among those Latinos who had college educations. Assets include liquid, investment, and real estate assets net of mortgages and other debts.

WEALTH OF BABY BOOMERS, BY RACE/ETHNICITY AND EDUCATION
